

Data Codebook for Experiment 3, Visual Search

File: *merged_vs_data.txt*

Variable Name	Description
sj	Unique identifier for each participant.
cb	Counterbalance
blockNumber	Block position in experimental task.
blockType	Always experimental in cleaned data.
trialNum	standing (4 blocks per participant) or sitting (4 blocks per participant)
target	Type of target (s or h)
targetImage	Name of target image file
distractor	Type of distractor (either u or e)
distractorImage	Name of distractor image file
posture	sitting or standing
setSize	4 or 8, number of items.
rt	Response time in milliseconds (ms).
resp	Participant response (s or h).
cresp	Correct response (s or h).
ac	1 is an accurate response (resp == cresp) [match] or 0 is an inaccurate response(resp != cresp) [do not match].
